

ONTARIO'S FAIR HYDRO PLAN

As part of the government's proposed Fair Hydro Plan, electricity bills will be reduced by 25% on average for households and small businesses across Ontario. The first part of the plan is effective May 1, 2017, with lower electricity rates and the discontinuation of the Ontario ESP Charge, combined with the 8% Provincial Rebate. This summer, the government intends to introduce legislation to implement the full Fair Hydro Plan and if passed, the OEB will then further adjust rates accordingly.
